## Key Issues In An Industrial Environment/Solutions

Issue	Service Offered	Key Differentiation
	Fly Control	Source reduction and critical area identification
	Integrated Rodent Management	Trend Analysis & critical points closures
	Mosquito Control	Identifying breeding areas & mapping
	Cockroach Control	Critical area identification and cracks & crevices closure
	Termite Control	As per BIS norms
	Spider Control	Effective for six months
	Weed Control	Low cost technology
	Bird Control	Multipronged strategy

# TOOLS

## Pests

## Products

## Equipments

World Health Organisation (WHO) Guidelines for storage of essential medicines and other health commodities

### Rodents:

Rodent problems are best solved by prohibiting rodent entry and maintaining a dry, clean facility. Other alternatives include keeping cats; traditional, spring loaded snap traps baited with food; **glue boards**, which are disposable plastic or wood trays partially filled with nontoxic, **adhesive glue**; bait boxes, which are shoe-sized boxes with lids and holes on each end containing **toxic rodenticide packets**; **electronic ultrasonic devices**, which emit high-frequency sounds, causing rodents to avoid the area; or rat poison.

### Flying pests:

The best prevention is to keep all doors and windows of the storage facility closed or screened off from the outside. Make sure there are no holes in the walls, floor, or ceiling. **Insect electrocuting light traps** (bug zappers, **insect electrocuting light traps**) using electric grids that attract flying insects via a bright fluorescent or ultraviolet light) may be appropriate in some situations.

# SUCCESSSTORIES

## Key Issues/ENTec Solutions

S.no.	Customer	Issue	Solution
1.	VIT-Chennai	Rodent Control	Implemented IRMS comprising of a) First line defense-Perimeter b) Second line defense-Traps c) Third line defense-Closures
2.	Sical	Termites	Reinfestation of termites after two months of treatment by an X company-Identified root cause and provided appropriate solution
3.	Renault Nissan	Weeds	Mapped weed types in a large area and implemented weed control project on a yearly contract basis
4.	JPHotel	Cockroaches	Implemented integrated cockroach control (ICC) a) Population study b) Devise strategy c) Implement d) Control
5.	CRCL, Chennai	Flies	Identified breeding source and devised baiting and service schedule to reduce population to acceptable levels

### TO WHOM IT MAY CONCERN

Dated: Dec 27, 2012

Dear Sir,

We at Arihant Escapade, a residential community of 280 flats with around 1000 residents located at Thoraipakkam, OMR, have engaged "Entec Pest Solutions" since Sep 1, 2012 to manage our pest control activities in our community comprising of 5.5 acres of land.

We have seen significant improvement in controlling the mosquitoes and other pests, thanks to effective deployment of professional pest control solutions from Entec Pest solution.

Thanking You,

*Rajan Sundaram*  
(For Secretary)
